

Tactile Asset Management

tactile

rugged solutions —

THE COMPANY

Head Office and service center in Stockholm

Focused on rugged IPC products and IT Solutions

Head Office and service center in Stockholm

Close cooperation with leading partners In Taiwan and the United States.

Own production, assembly and configuration locally in Sweden.

Service / repair and support is performed in Sweden.

Positioning System Introduction

Basic positioning system

Value-added application system

Location big data platform

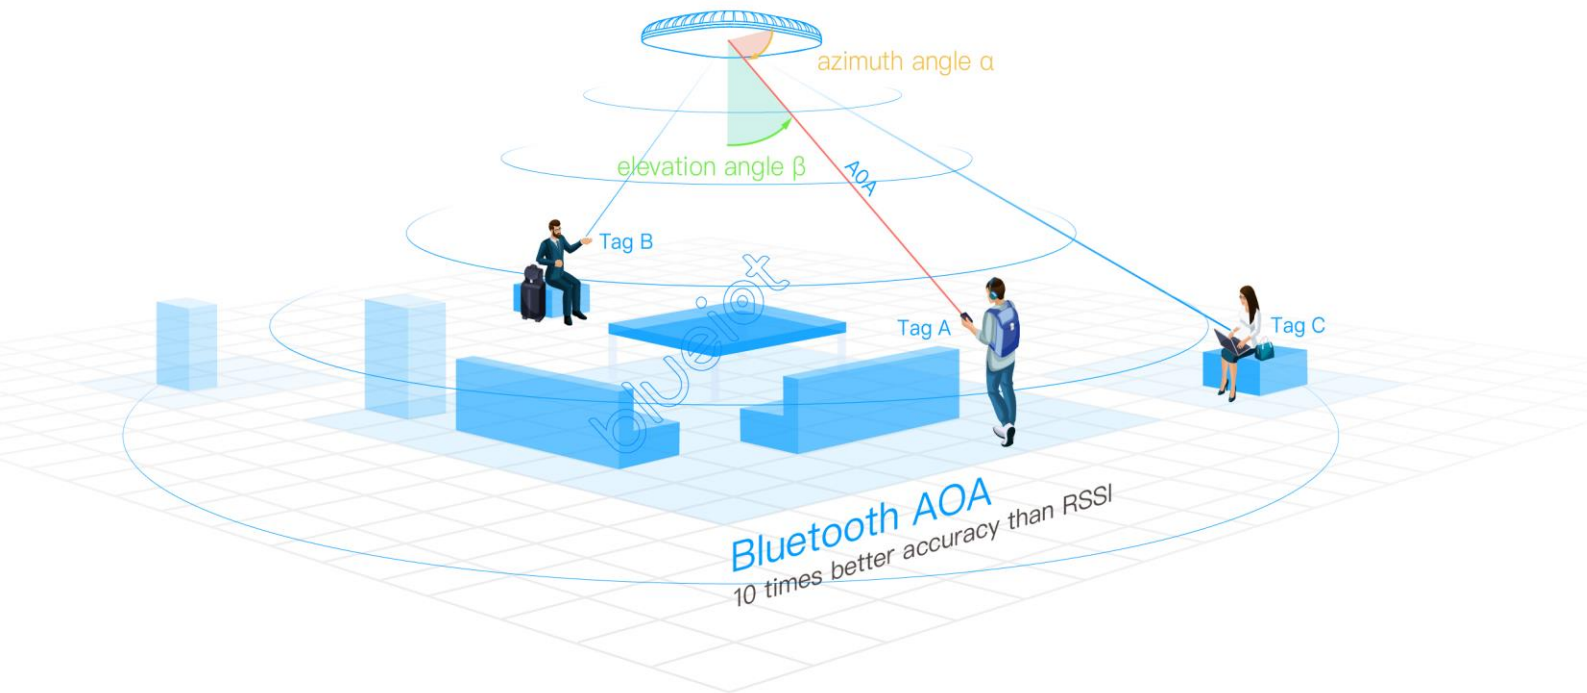

Basic positioning function

- Position map service
- Real-time track display
- Organizational structure management
- Electronic fence and alarm management
- Software rights management

Value-added application system

- Historical track storage and playback software
- Automatic attendance and working hour statistics software
- Confirmation software for automated patrol task
- Security camera linkage and recording software
- Regional statistics and electronic roll call software

Technology Overview

Typical accuracy: 0.1 ~ 0.5m

- Locating with one anchor and two angles
- Accuracy level down to 10cm
- Supports Bluetooth 5.1
- Compatible with BLE 4.0 tags or above
- Compatible with mobile phones

How does Bluetooth AoA work ?

How does Bluetooth AoA work ?

Locating with one single locator

Height difference		High precision locating area $3H^*$
	$< 5m$	Sub-meter accuracy $4H^*$
	$> 5m$	16~20meters

* Based on laboratory test results.

How does Bluetooth AoA work ?

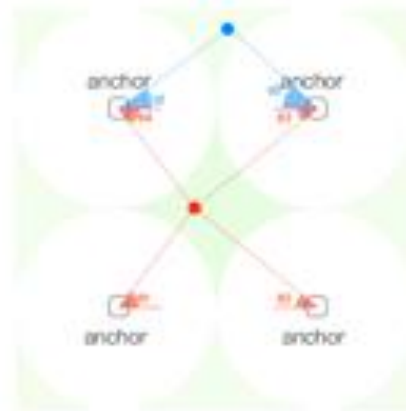

Multi-anchor and large area positioning

Strapdown combination of multiple anchors to obtain larger positioning coverage space
Multiple anchor course angle calculations improve the global spatial accuracy level

Coverage area of each anchor

Joint calculation of course angle of multiple anchors

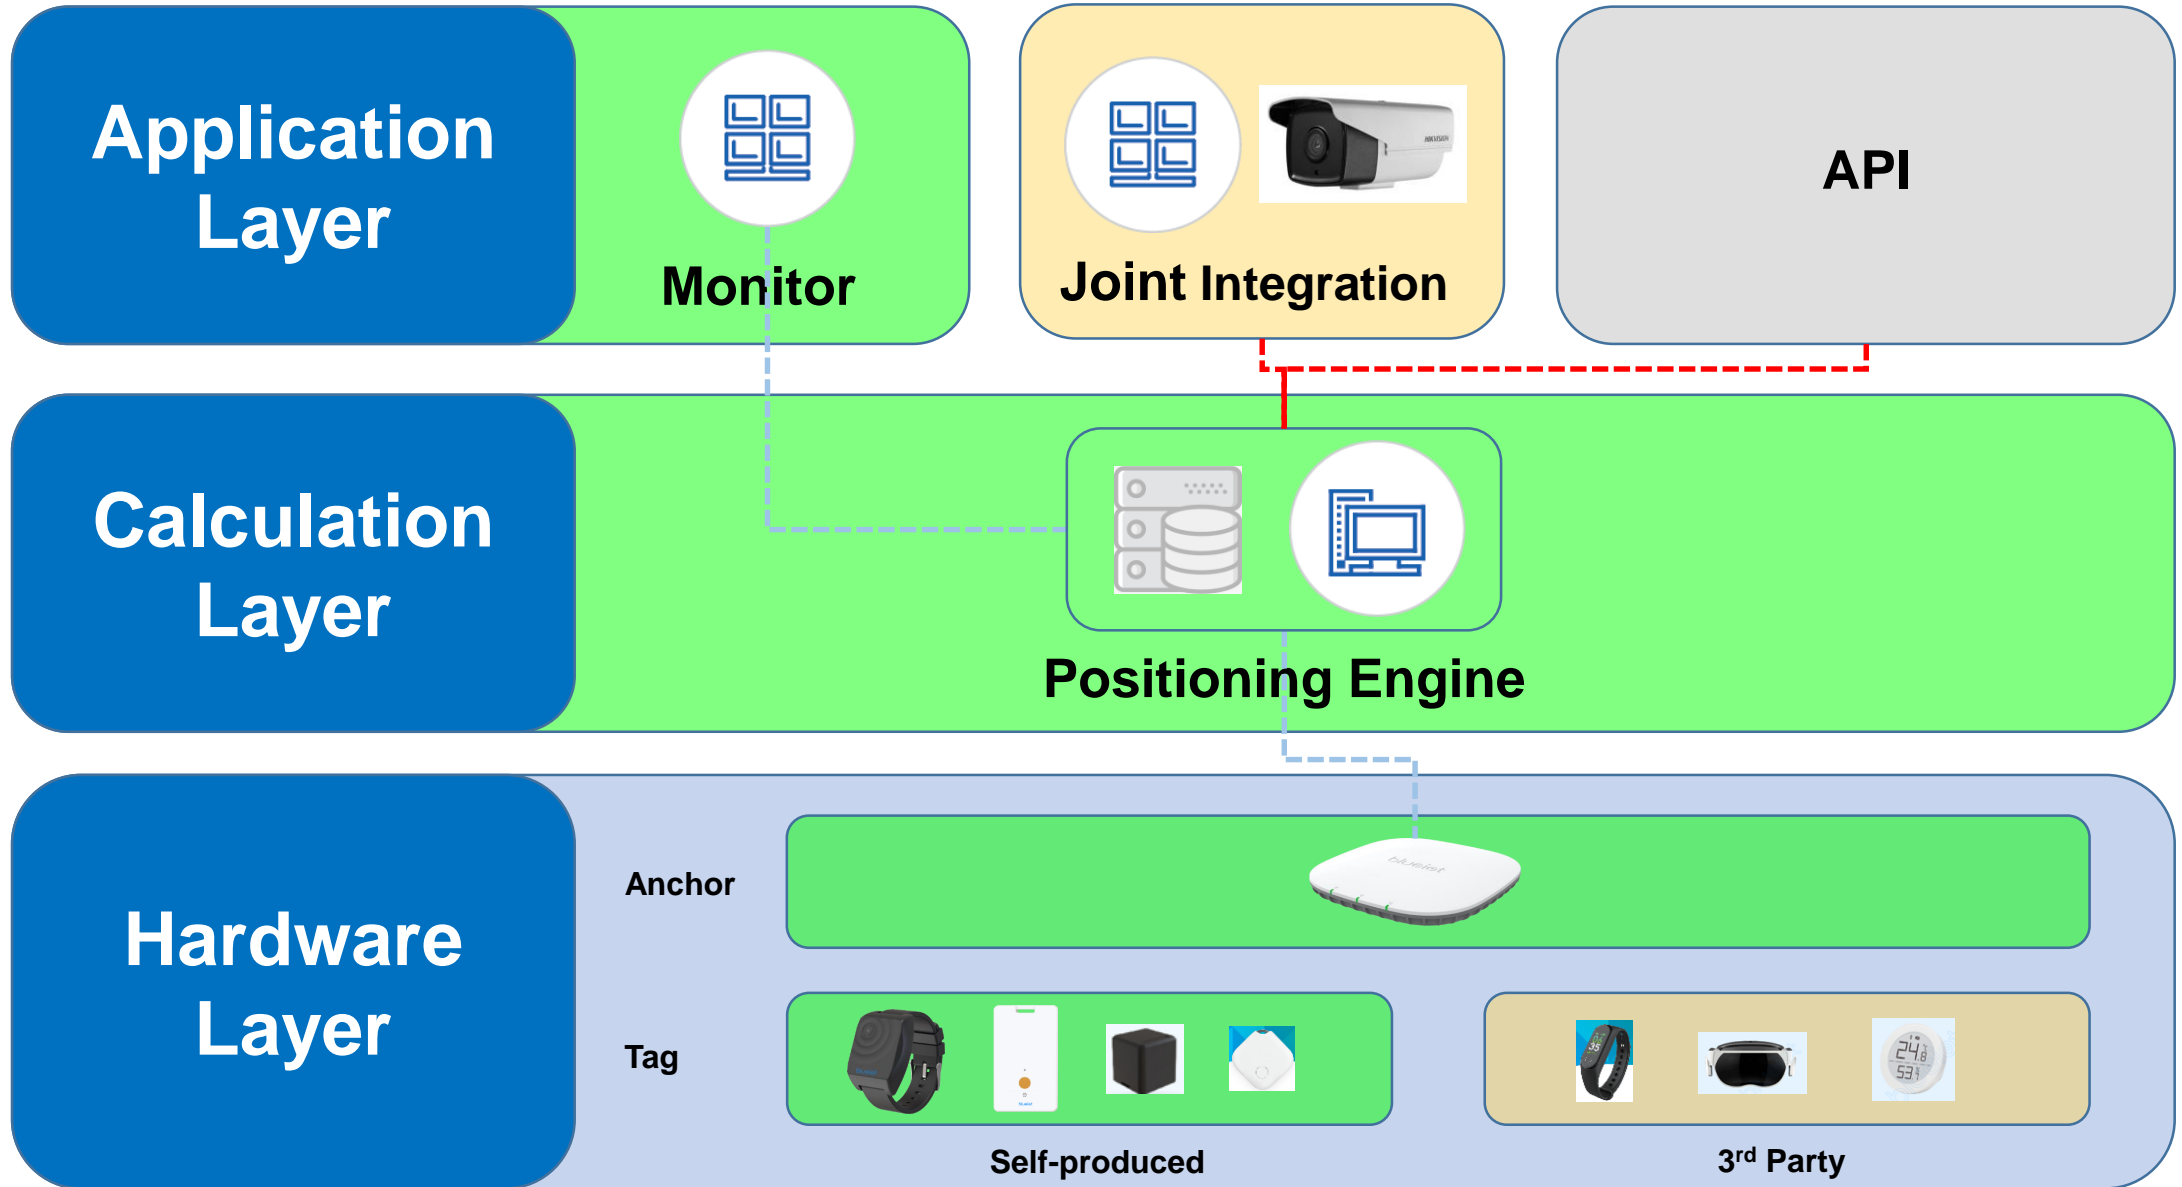

High-precision/sub-meter precision full coverage

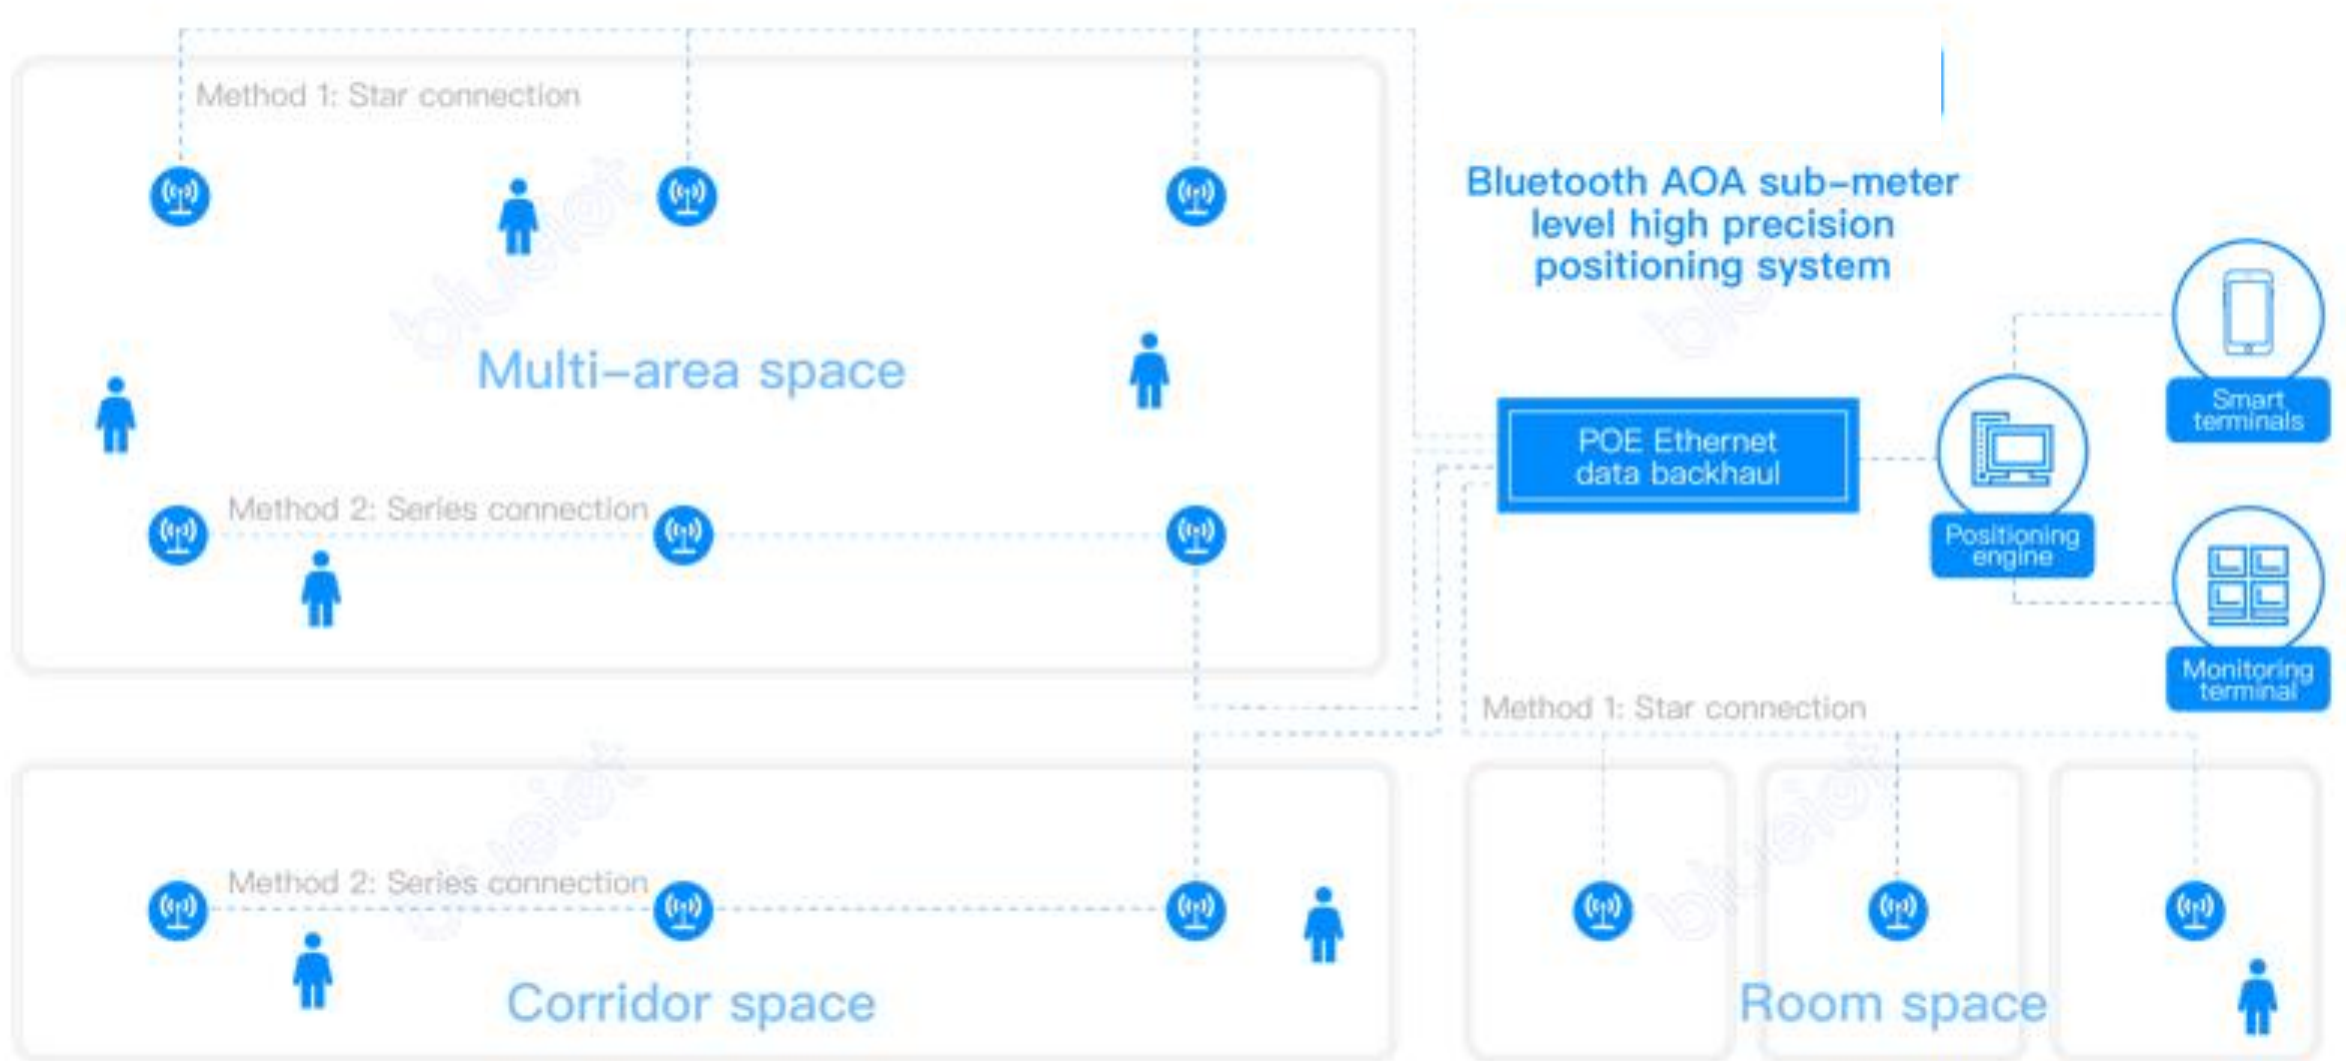

How are AoA anchors deployed?

Different ceiling height scenarios	Recommended anchor spacing	Typical average accuracy	Schematic diagram
3.5 meters (General office buildings)	10–12 meters	0.1–1.0 meters	
5 meters Supermarket/station /warehouse	12–16 meters	0.3–1.0 meters	
10 meters Exhibition/Airport	16–20 meters	0.3–1.0 meters	

Solution

Methods

Advantages of Bluetooth AOA

Accurate

Positioning accuracy
down to 0.1-0.5m

Long-lasting

Lower power consumption
battery lasting up to 5 years

Small

Various tags as
small as a coin

Low-cost

The lowest total cost of
ownership in the industry

High Concurrency

One anchor supports
500 tags (1Hz)

Open Ecology

Compatible with Bluetooth terminals,
accurate LBS for smartphone

Products

Locating tag

BT1000-w (Tb1100-w)

Wristband | Bluetooth Location Tag

Battery type : Rechargeable LI
Working hours : charge every 4 ~ 6 months
Working temperature : -20 ~ 70°C
Waterproof rating : IP65
Size : 54.5 * 40 * 16.5mm

- ☒ Buzzer
- ☒ Button alarm
- ☒ Vibrator
- ☒ Swiping RFID

BT1000-g (Tb1100-g)

Badge | Bluetooth Location Tag

Battery type : Rechargeable LI
Working hours : charge every 4 ~ 6 months
Working temperature : -20 ~ 70°C
Working humidity : 10% ~ 90% no condensation
Size : 85 * 54 * 6mm

- ☒ Buzzer
- ☒ Button alarm
- ☒ Vibrator
- ☒ Swiping RFID

Locating anchor

BA3000-p (outdoor)

Data interface : Standard Ethernet
Power interface : POE
Working temperature : -40 ~ 80°C
size : 330mm*330mm*53mm
Ingress Protection: IP67

BA3000-t (indoor)

Data interface : Standard Ethernet
Power interface : POE
Working temperature : -20 ~ 70°C
size : 230mm*230mm*35mm
Ingress Protection: IP43

BT2000-z
Assets

BT2000-z

voice interaction

Application Scenario

Transportation

Effectively release the value of the location data of the "last mile" of the transportation hub, improve the intelligent traffic management and personalized service

Retail

Shopping cart and goods positioning management, consumer navigation and shopping guide, empowers supermarket big data analysis and refined management

Hospital/Healthcare

Location-based internal management and business processes bring more reliable services and smarter human-to-human interaction

Exhibition

Using mobile phone navigation, low-cost Bluetooth tags position venue precisely, building a new model of exhibition location data value

Application Scenario

Judical

Realize accurate positioning of personnel in prisons, detention centers, and investigators center, with high accuracy, large capacity, and no false alarms

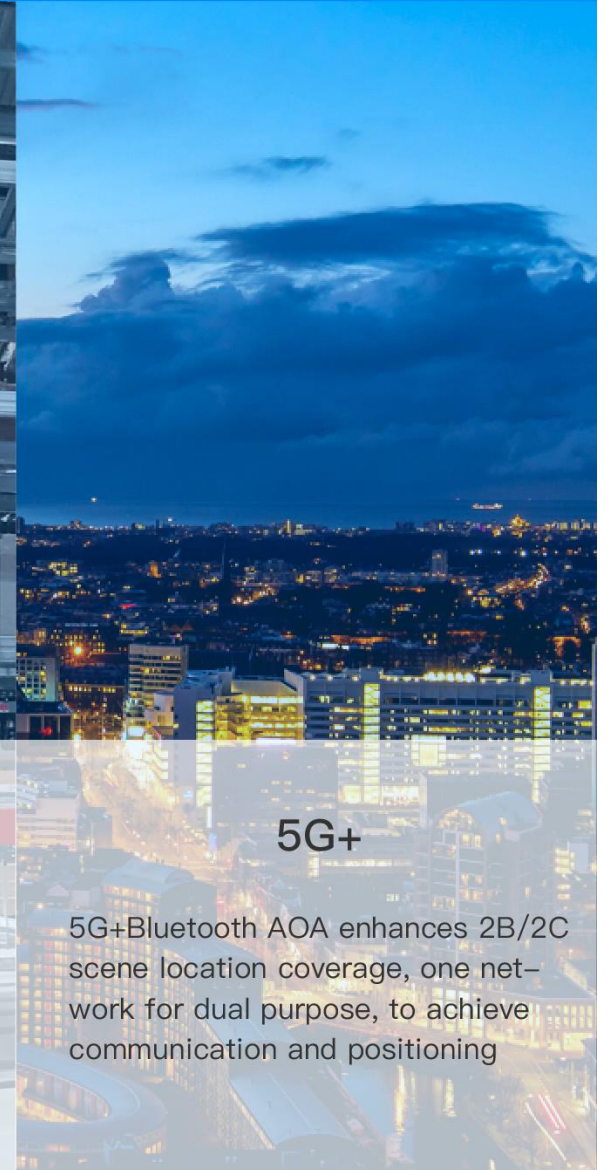

Industry

With sub-meter precision, positioning management of personnel and equipment in smart factories helps achieve high-efficiency and automated lean production

Logistics

Low-cost, high-precision positioning, seamless access of various location information to ERP\WMS\PMS, much improving efficiency

5G+

5G+Bluetooth AOA enhances 2B/2C scene location coverage, one network for dual purpose, to achieve communication and positioning
